

UNITED CVTF TC

Product Description

Synthetic Continuously Variable Transmission Fluid blended from high-performance synthetic base oils and carefully selected additives, including friction modifiers, detergent-dispersants, anti-oxidants, viscosity index improvers, corrosion inhibitors, and defoaming agents. It is a well-balanced fluid specially designed for use in latest generations of Continuously Variable Transmissions (CVT) which transfer traction via steel-made traction chains or belts. It provides outstanding power transmission ratios and better fuel-economy performance as compared to regular automatic transmissions, with many car makers adopting CVTs in more and more models.

Applications / Benefits

- * Provides excellent friction, oxidation and thermal stability
- * Outstanding anti-wear properties and oil film thickness
- * Excellent low temperature fluidity, reducing start up wear
- * Longer life through use of synthetic base and carefully selected additives

Typical Characteristics

Test Description	Method	Unit	
Density @ 15 °C	ASTM D 4052	kg/L	0.852
Flash Point	ASTM D 92	°C	198
Pour Point	ASTM D 97	°C	-45
Kinematic Viscosity @ 40°C	ASTM D 445	cSt	30.5
Kinematic Viscosity @ 100°C	ASTM D 445	cSt	7.1
Viscosity Index	ASTM D 2270	-	208
Brookfield Viscosity @ -40°C	ASTM D2983	mPa.s	<15000
Appearance	Visual	-	Red
