

UNITED HEAVY GREASE

Product Description

Premium Heavy Grease formulated with calcium soap and a specialized rust inhibitor. It features a smooth, buttery texture and a distinctive shiny red color. This heavy grease provides exceptional protection against bearing wear, ensuring superior film strength even under severe shock-loading conditions.

This product suitable for a wide range of automotive grease applications, including wheel bearings, ball joints, universal joints, steering linkages, and water pumps. It is also recommended for industrial applications where a balance of moderate dropping points and exceptional water resistance is required.

Applications / Benefits

- * Provides superior anti-rust protection
- * Superior oxidation resistance, extends service life
- * Minimizes leakage at elevated temperatures
- * Resists water washout from bearing

Typical Characteristics

Test Description	Method	Unit	
NLGI Grade	-	-	2.5
Thickener	-	-	Calcium Soap
Colour	-	-	Shinning Red
Appearance	Visual	-	Tacky
Base Oil	-	-	Blend Mineral Oils
Worked penetration	IP50	-	250 - 265
Dropping Point	IP132	°C	110 min.

Reference No.
